

HW250AMH

MATERIAL HANDLER

Gross Power
129 kW (173 hp) at 2200 rpm

Maximum Height
12000 mm (arm pin height)

Operating Weight
26500 – 27900kg

HYUNDAI
CONSTRUCTION EQUIPMENT

READY TO CHANGE YOUR WORLD

Our new A-Series HW250A MH is ready to build your world. The 6 cylinder Cummins B6.7 Stage V engine is perfectly balanced to deliver 129kW (173hp) with unmatched efficiency. Featuring a new tough exterior design with added safety features and a host of new cab features, you can rely on the HW250A MH to provide maximum mobility and productivity on the toughest waste sites.

A
SERIES HW250A_{MH}

THE BEST PRODUCTIVITY AND FUEL EFFICIENCY

From its upgraded, eco-friendly engine to its carefully chosen control technologies, the HW250A MH wheeled excavator helps operators to achieve new heights of productivity. Hyundai's EPFC (Electronic Pump Flow Control) hydraulic system, combined with attachment flow control, ECO Gauge and proportional joysticks and pedal control, enables the machine to deliver the exact performance and efficiency when and where it's needed.

EU Stage V Certified Engine

The HW250A MH is equipped with a fuel-efficient Cummins B6.7 Stage V engine that meets the world's strictest emission regulations. Its compact 6-cylinder configuration delivers impressive power and performance.

The Cummins B6.7 engine satisfies the strictest environmental emission regulation in the world including a 60% reduction in Particulate Matter (PM).

The technology to improve efficiency

High-performance hydraulics

The HW250A MH features Hyundai's EPFC (Electronic Pump Flow Control) hydraulic system. It uses electronically controlled pumps, changeable machine parameters on the cabin display and provides a minimum flow rate. This results in improved controllability and reduced fuel consumption.

Efficient cooling system

The HW250A MH provides excellent cooling performance by increasing heat dissipation and reducing downtime caused by overheating.

Eco gauge

Helps operators to reduce emissions and running costs by constantly monitoring efficiency. It displays engine workload and fuel-saving status while the machine is working.

Eco Gauge

2.5 meter high rise cabin, provides increased visibility for improved productivity and safety.

Wide axles

The HW250AMH comes standard with wide axles and solid rubber tires, for increased stability during heavy lifting operation.

Proportional auxiliary hydraulics

Productivity is further enhanced by a proportional auxiliary hydraulics system. A proportional single or double-acting circuit is installed as standard, enabling smooth, precise control of attachments.

Engine auto-idle

The auto-idle feature saves fuel, reduces noise and cuts exhaust emissions by automatically switching the engine to idle setting when the excavator is inactive.

Arm cylinders

Dual side mounted arm cylinders improve balance and strength, whilst providing increased protection.

NEW EXTERIOR DESIGN FOR ROBUSTNESS AND SAFETY

The true value of the HW250A MH lies in its durability and high productivity. The robust upper and lower frame structure can endure external shock and heavy work loads. Attachment performance has been proven through rigorous field testing. No matter how tough the working environment is, you can always rely on the Hyundai material handling machine.

Tougher from the ground up

► Reinforced durability

Built for unbeatable strength and sturdiness, the HW250A MH offers solid performance over its lifespan. The upper and lower frame structures are reinforced for tough working conditions, while the front attachments have been rigorously tested for the roughest conditions.

Reinforced pins, bushings and polymer shims

The HW250A MH improves lubricity of connecting parts between the equipment and attachments. Gaps with attachments are minimized by wear-resistant long-life pins, bushings, and polymer shims, supporting the highest performance with invariable durability.

Better weight balance

The machine is standard-equipped with four outriggers and solid rubber tires, for excellent ground stability during lifting operation or travel.

Durable cooling module

Tested to extremes, the HW250A MH has a durable cooling module proven to perform at maximum productivity levels in the toughest working environments.

Cabin structure

The HW A-Series cabin structure uses integrally welded low-stress, high strength steel to meet ROPS and FOG certification.

- **ROPS:** Roll-Over Protective Structure ISO12117-2
- **FOPS:** Falling Object Protective Structure
- **FOG:** Falling Object Guard Level 2 (Option) ISO10262

► Hi-grade (high-pressure) hoses

The HW250A MH uses high-pressure hoses with improved heat and pressure resistance, greatly increasing the durability of the equipment.

The 4-wheel hydrostatic drive system ensures a smooth driving experience, even in rough conditions.

EASY CONTROL AND COMFORTABLE OPERATION

Many electronic functions are concentrated in the most convenient spot for operators to improve work efficiency. The highly-advanced infotainment system, a product of Hyundai's intensive information technology development, enables both productivity and comfort while working. The HW250A MH really is designed with the operator in mind.

Ergonomic for efficient operation

▶ Intelligent & wide cluster

The 8" capacitive-type display is similar to a smartphone to deliver excellent legibility. Amongst the key functions the centralised switches on the display allow convenient checking of the Adblue/DEF level and temperature outside the cabin.

▶ Auxiliary joystick and pedal control

A 2-way proportional auxiliary joystick and pedal control enable effortless operation to minimise operator fatigue.

▶ Proportional auxiliary hydraulic system

A proportional control switch with better speed control provides operators with added convenience whenever they do time-consuming work. This function can also be switched to control by foot pedal, by changing the setting in the cluster menu.

▶ Jog Dial Module

The accelerator, remote air conditioner controller and instrument cluster can be operated using the convenient jog shuttle-type controller.

Functionality at your fingertips

Joystick steering

The HW250A MH can be optionally equipped with joystick steering, to enable quick and easy manoeuvring and enhanced productivity.

Work mode memory

The operator can select from three different work modes – Park, Work and Travel – for convenient automatic control of a range of functions.

FNR and ram lock switch

The Forward/Reverse switch is positioned right at the operator's fingertip. The front axle oscillation lock can also be activated from the joystick, improving convenience and productivity on demanding jobs.

Fine swing & swing lock system

This option enables smooth movement at the start and stop of swing operation (cushion swing). The swing lock function provides additional safety, during road travel or transportation.

The HW250A MH cabin is designed with the operator in mind. Many electronic functions are concentrated in the most convenient spot for operators to improve work efficiency.

A deluxe seat and full climate control provide a comfortable working environment for the operator.

THE ULTIMATE SAFE ENVIRONMENT

The Hyundai approach to safety goes far beyond just meeting regulatory standards. We prioritise safety in every aspect of our machines and work with our customers to keep improving protection for operators, co-workers, passers-by, surrounding buildings and of course the machines themselves.

Visibly safer

The HW250A MH features a cab that can be raised by 2.5 metres enhancing visibility for improved productivity and safety. The elevated position is beneficial for loading high-sided containers and reducing damage, optimizing efficiency, and enhancing workplace safety.

3D view using AI

SAVM (Smart Around View Monitoring) camera system is available as an option, providing obscured 360 degree field of vision for the operator. Including AI-based object detection.

SAVM: secure field of vision in all directions through ten views including 3D bird's eye view and 2D/4CH view.

Built for safer operation

Cabin viscous mount

A coil spring and damper inside the cabin viscous mounts improve durability and provide a comfortable operating environment that lessens fatigue.

Emergency steering

If the hydraulic supply should fail, manual steering is automatically enabled.

Camera system

A rear view camera and side camera are standard features, same as the second monitor, providing the operator with a permanent view to machine surroundings.

Seat belt warning alarm

If the seat belt is not buckled when the ignition key is turned, an alarm is triggered in intervals along with a continuous visual alert. This emphasises our priority for operator safety.

Electronic swing brake

An electronic valve and control system has been added to improve safety and utilisation. The opening and closing time of the swing brake valve is controlled according to the sensing and control system.

Cruise control & speed limiter

Cruise control and speed limiter allows the operator to regulate speed whilst in transit. An automatic creep speed enables the operator to concentrate on finer machine control and operation.

Axles and fenders

The HW250A MH is equipped with a heavy duty axle for higher durability and to enhance stability in different conditions and material handling applications. Sturdy fenders, covering the wheel even when steering, have been added to protect the tyres from flying debris while driving.

Outrigger steps, and large side cab step for easy & safe access to cabin

Activate Auto Safety Check

The Auto Safety Lock prevents unintended operation due to the excavator not being controlled solely by the RCV lever.

SERVICEABILITY AND TELEMATICS

The HW250A MH is designed with quick, low-effort servicing in mind. Every component and material has been optimised to ensure a long, trouble-free life. Hyundai's innovative Hi MATE telematics system enables full monitoring of machine activity and performance. Maximum connectivity is integrated to help owners create a smart construction site and protect profitability as their business grows.

Less maintenance. More uptime

Improved routine maintenance

Easy access for maintenance means regular checks get done faster, giving you more uptime and reducing operating costs. Ground level access to filters, lube fittings and master switches make servicing more convenient.

Longer maintenance intervals

The service interval of the fuel filter on the new engine has been increased by 100% (from 500h to 1000h). In addition the long life hydraulic oil (5000h change interval) contributes greatly to reduce the maintenance cost.

Fuel Filler Pump

An integrated fuel filler pump with auto stop makes refuelling quick and easy.

DEF/Adblue filler access

Access to the DEF/Adblue tank filling point has been made easier with redesigned steps.

HiMATE

It's convenient, easy and valuable. Hi MATE, Hyundai's remote management system, utilises GPS-satellite technology to provide customers with the highest level of service and product support available.

Increase productivity

By providing information such as service hours, idle time and fuel consumption, Hi MATE saves you money and improves productivity. Service alerts enable better maintenance planning.

Monitor your machines

Hi MATE's real-time location information allows convenient monitoring of your equipment via the Hi MATE website or mobile app.

Improve Security

Protect your equipment from theft or unauthorised usage. Hi MATE's geofencing alerts notify you automatically when a machine leaves a predetermined zone.

ECD

(Engine Connected Diagnostics)

ECD provides troubleshooting information as well as tailored servicing. Service technicians are supported with remote diagnostics allowing them to achieve quick resolution rate.

Mobile fleet app

Our Mobile Fleet app provides all the information you need to run your fleet efficiently and economically.

HCE-DT Air connects you and your equipment wirelessly via smartphone and laptop right on site.

Keeping you covered

Hyundai genuine parts and accessories are designed to keep your machine running at optimum performance, providing increased uptime, comfort and productivity. Our 13000m² European Parts Warehouse guarantees 24-hour delivery across our dealer network. Hyundai Standard and Extended Warranty Programmes are also available, providing peace of mind and giving you full control over your operating costs.

TAKE THE TOUR!

4
SERIES HW250A_{MH}

Productivity & Efficiency

- High-performing Stage V engine with advanced exhaust aftertreatment
- Straight or gooseneck arm options
- 2.5m high rise cabin
- Dual arm cylinders
- Hydraulic ram and piping covers
- Fast speed for boom and swing
- Dual Proportional RCV & Rotational Piping

Comfort

- 3-way adjustable steering column
- Large touchscreen
- Second monitor for camera view
- Joystick steering **OPTION**
- FNR and Ram-Lock Switch on Joystick
- Air-pistol for easy cleaning **OPTION**
- Full climate control

Durability

- Reinforced upper and lower frame structure
- Flexible hose protection
- Impact protection bumpers on upper frame
- Reinforced pins, bushings and polymer shims
- Solid rubber twin tyres

Serviceability & Connectivity

- ECD (Engine Connected Diagnostics)
- Improved DEF/AdBlue filler access
- Fuel filler pump with auto stop **OPTION**
- Hyundai Hi MATE telematics system
- Mobile Fleet app
- Centralised greasing system **OPTION**

Safety

- Full cab guard **OPTION**
- LED working lights
- ROPS / FOPS certified cabin
- Safety glass
- Auto safety lock
- Safety valves on all cylinders
- Emergency cabin lower valve

HW250A MH

SPECIFICATIONS

SPECIFICATIONS	HW250A MH
ENGINE	
Maker / model	CUMMINS / B6.7
Type	4 cylinder, water cooled, 4-cycle, turbocharged charge air cooled, direct injection, electronic controlled diesel engine.
Gross power	129 kW (173 hp) at 2200 rpm
Net power	127 kW (170 hp) at 2200 rpm
Max. power	145 kW (195 hp) at 2200 rpm
Peak torque	881 Nm at 1300 rpm
Displacement	6.7 ℓ

HYDRAULIC SYSTEM	
EPFC - Electronic Pump Flow Control	
MAIN PUMP	
Type	Piston pumps
Max. flow	2 x 208 lpm
Sub-pump for pilot circuit	Gear pump

HYDRAULIC MOTORS	
Travel	Two speed axial piston motor with brake valve and parking brake
Swing	Axial piston motor with automatic brake
RELIEF VALVE SETTING	
Implement circuits	350 kgf/cm ²
Travel	380 kgf/cm ²
Power boost (boom, arm, bucket)	380 kgf/cm ²
Swing circuit	265 kgf/cm ²
Pilot circuit	40 kgf/cm ²
Service valve	Installed
HYDRAULIC CYLINDERS	
No. of cylinder bore x stroke	Arm: 2 x 1-115 x 1138 mm
	Outrigger: 4-130 x 436 mm
	Boom: 2-120 x 1275 mm

DRIVES & BRAKES	
4-wheel hydrostatic drive. Constant mesh, helical gear transmission provides 2 forward and reverse travel speeds.	
Max. drawbar pull	11600 kgf
Travel speed 1st / 2nd	9.5 km/h / 38.4 km/h
Gradeability	35° (70 %)
Service brake :	
- Independent dual brake, front and rear axle full hydraulic power brake.	
- Spring released and hydraulic applied wet type multiple disc brake.	
Parking brake :	
- Spring applied and hydraulic released wet disc brake type in transmission.	

CONTROLS	
Pilot control	Two joysticks with one safety lever (LH): Swing and arm, (RH): Boom and bucket (ISO)
	FNR switch on RH joystick / Ram lock switch on LH joystick
Attachment control	3 modes available: Push / Proportional / Permanent
Engine throttle	Electric, Dial type
Operation Mode	3 modes available: P-Parking W-Working T-Travel

SPECIFICATIONS	HW250A MH
AXLE & WHEELS	
Full floating front axle is supported by center pin for oscillation. Oscillation lock (ram lock) function for safe operation. Rear axle is fixed on the lower chassis.	
Solid tyres	10.00-20-16PR, Dual
STEERING SYSTEM	
Hydraulically actuated, orbitrol type steering system actuates on front wheels through steering cylinders.	
Min. turning radius	6690 mm

SWING SYSTEM	
Swing motor	Fixed displacement radial piston motor
Swing reduction	Planetary gear reduction
Swing bearing lubrication	Grease-bathed
Swing brake	Multi wet disc
Swing speed	10.7 rpm

COOLANT & LUBRICANT CAPACITY	
liter	
Fuel tank	310
Engine coolant	40
Engine oil	24.4
Swing device - gear oil	6.2
Axle	Front 14.6
	Rear 18.5
Transmission	2.5
Hydraulic system (including tank)	340
Hydraulic tank	165
DEF/AdBlue®	48

UNDERCARRIAGE	
Reinforced box-section frame is all-welded, low-stress.	
Front and rear outriggers	Provide maximum operation stability when lifting.

OPERATING WEIGHT	
Weight without attachment, front and rear outrigger, Elevating Cabin	
Gooseneck boom	24700 kg
Straight boom	24900 kg

AIR CONDITIONING SYSTEM	
The air conditioning system contains fluorinated greenhouse gas refrigerant R134a (Global Warming Potential = 1430). The system contains 0.8 kg of refrigerant representing a CO ₂ equivalent of 1.14 metric tonnes.	

HW250A MH

DIMENSIONS & WORKING RANGE
